AMERICAN COLLEGE OF EMERGENCY PHYSICIANS

Geriatric Emergency Medicine Section

Operational Guidelines

The Geriatric Emergency Medicine Section is chartered by the Board of Directors (Board) of the American College of Emergency Physicians (College) to provide a forum in which members of the College with special interests in geriatric emergency medicine can **develop a knowledge base, share information, receive and give counsel, and serve as a resource to others interested in this area of geriatric emergency medicine.**

GEM

- Patient involvement
- To involve patients and their relatives/representatives to provide feedback on the goals and activities of the taskforce.
- To investigate determinants of older patients' satisfaction and how this differs across Europe.
- Research
- To establish a research agenda for Geriatric Emergency Medicine in Europe.
- To initiate research projects and create research alliances within Europe.

GEM

- Clinical care
- To create European Elder-friendly Emergency Department guidelines.
- To create practice guidelines for specific syndromes in older Emergency patients.
- To develop a system to accredit Emergency Departments which are Elder-friendly
- To create a toolbox with screening and assessment tools available for healthcare professionals throughout Europe, enabling them to select the evidence-based tools that are appropriate to use in their local setting.

GEM

- Education
- To promote and implement the Geriatric Emergency Medicine curriculum throughout residency training of Geriatricians and Emergency Physicians.
- To develop education packages and teach other healthcare professionals relevant for GEM.
- Governance
- To establish working groups each pertaining to an individual goal and to mobilize health care professionals to actively participate in Geriatric Emergency Medicine.
