

Thursday, November 26, 2020

Dear colleagues,

Is it possible to announce the following EAMA course to the members of your Geriatric Society? We also want to encourage Geriatric Societies to support some of the promising (young) geriatricians to participate to this course. For those countries how have not an established geriatric discipline or organizations, EUGMS supports the attendance of promising geriatricians with a scholarship. More information regarding these scholarships, can be obtained by the candidates on the website or through contact with our secretary.

The European Academy for Medicine of Ageing (EAMA) is looking for enthusiastic geriatricians to join the XIVth EAMA course starting June 2021. We plan an alternative educative programme in case COVID-19 is still limiting travel capacity.

The EAMA was founded in 1995 to develop capacity, competence and leadership in geriatric medicine in Europe. To equip geriatricians with the necessary knowledge, skills and behaviours to further drive forward geriatric medicine in their own countries and at the European level, the competency based curriculum is recently adapted to the new challenges in Geriatric Medicine.

Please have a look at the website www.eama.eu to learn more about the learning objectives of this course, the members of the executive board, the application rules and practical aspects as locations, prices etc.... Please contact our secretariat if you have any questions or concerns by mail to mieke.laforce@eama.eu

We hope we can welcome you in June 2021

Kind regards.

In name of the executive board

Prof Dr Nele Van Den Noortgate

President of the EAMA
